---

#### In this role you will:

- Act as primary lead in the development, review and update of databases, software and applications developed in-house. Perform development and support of enhancements, extensions, and interfaces for T&D critical software systems.
- Produce technical and confidential correspondence, reports, and spreadsheets for managers; process personnel actions including discipline, pay changes, hiring, and promotions.
- Assists T& D personnel inside and outside of Electric Operations to ensure timely resolutions across multiple vendor information systems including hardware, operating systems and application interfaces. Provides close support for critical software systems.
- Monitor systems to ensure efficient resource utilization and resolves any issues discovered. Support installation and configuration of applications and hardware components.

---

#### Qualifications:

The ideal candidate will possess knowledge, skills, and mental development equivalent to the completion of a Bachelor's degree with coursework in computer science, along with at least two years of experience in personal computer network administration. This includes expertise in application software within a network environment, Microsoft network administration, SQL database administration, and application software installation in a networked setting. Alternatively, any equivalent combination of education and experience that demonstrates these competencies will be considered. The ideal candidate will also have the ability and willingness to work overtime and be on-call as needed to support the needs of the department. **Preference for employment in all positions with the city shall be given to applicants who are full-time city residents.**

---
